

4.4 - Delivery and Design of DSMES Services

Annual Review Template

Every year, accredited programs are required to review their DSMES curriculum content, delivery and program design to ensure they meeting the needs and preferences of the target population and reflects current evidence, practice guidelines and cultural appropriateness. There are many ways this can be documented, please select at least one and provide a brief description of your process and attach at least one supporting document.

- Evidence of a DSMES process that has been updated to improve patient care
- Evidence of a patient education material that has been updated to improve patient care
- Evidence of a team meeting with agenda and summary of action items
- Overview of review process and updates to programming as a result
- Other evidence that DSMES services are being reviewed for current evidence and guidelines

Brief Description of process and supporting document:
